

♡ *I greet you in the name of Jesus Christ.* ♡

In this day and age, through financial, political, and societal hardship, people face many problems. In the midst of all of this, rather than being happy, people are faced with fear as they wander around trying to solve their problems. What's more, they go on suffering as they live trapped within their problems, merely accepting them as their fate or destiny. If you or anyone you know is suffering because of such problems, we can offer you help at anytime. A problem that we did not take seriously can one day turn into a familial problem, which then becomes society's problem and, ultimately, becomes a national problem. In the end, all these problems come back to us as an individual.

♠ *One day has your husband or wife...*

Perhaps because of a failed business venture or another matter, has your spouse ever turned to alcohol, gambling, cheating, or ever been suspicious of your infidelity for no reason? Do they suffer from anxiety, stress, or depression (frustration, fear, suicidal thoughts) unable to find happiness?

♠ *The son or daughter you love*

Are they anxious, unable to concentrate, become irritable, lie, steal, or rebel by running away from home? Do they have problems at school? Or are they befriending the wrong crowd/girlfriend/boyfriend, or have they been emotionally hurt due to problems in your family?

♠ *Is someone in your family*

Suffering from a mental problem, drugs, cancer, or disease that doctors say is incurable?
Or are they constantly sick for an unknown cause?

♠ *In your life as an immigrant*

Have you ever suffered mentally because you could not adapt to your new surroundings, or felt very lonely?

♠ *Other than these things*

Have you ever been close to divorcing your spouse because of harsh problems in your family?
Have you ever suffered from some unknown feeling of anxiety or nightmares?
Or have you developed a bad habit that you know is wrong, yet you cannot control by your own self will?

♠ *Your religious life*

Even though you pray and devote yourself to church/house of worship, do feel in conflict because your personal problems are not being solved?

Or perhaps you or someone you know has fallen into a cult or do not see the reason why you must go to church?

All these problems are not just things that can be ignored. These personal problems, whether spiritual or physical, will not just stop with you -- they will carry on to your children. For example, a particular problem in your family (e.g.- continuous failure despite working hard, gambling addiction, alcoholism, divorce, etc.) will not only affect you, but will be an on-going cycle that will affect your children as well. Through talking about and sharing such problems, I sincerely would like to help you regain the lost happiness in your life.

To have a problem means that there is a solution. That is why people must absolutely receive the answer that God has given to them. If you are happy, then your family as well as society shares this happiness. On the other hand, if you are unhappy, your family and all of society will be darkened with unhappiness. This reason is why I want to help you understand the true solution to all of these problems.
